## Highlights of the week

- ✘ Students are flying through their lessons on [code.org](https://code.org). Their problem-solving skills are being challenged as we work through the lessons.
- ✘ All of the kids in the class have been rocking their multiplication we have been doing!
- ✘ We had a great last day before the break finishing up work and then playing games together with the 4A class. The dice game got pretty intense — it's hard to roll doubles!

Blessings,

No Bible Memory this Week

## For your information

- **Multiplication** - We have been working with our first multiplication strategy; the **Area model**. This strategy teaches students how to decompose the multi-digit number before multiplying. All the students are off to a great start!

1.)  $5 \times 82 =$

5	80	2
400	10	

$$\begin{array}{r} 400 \\ + 10 \\ \hline 410 \end{array}$$

-**Gym Clothes** - I will be sending home all the gym clothes home over spring break to be washed and then you can send them back on April 3rd!
